Cremone Information & Options

Knob & Lever Positions

All Cremones are supplied configured with the Lever/Knob in a horizontal orientation when opened and vertical when closed. This configuration can be reversed on site if required.

Exterior Plates - Fixed Dead (Dummy) Option

As an alternative to using Taylors Spindles we can factory fix dead Knobs & Levers to Exterior Plates. To order this option, add FDL, FDR or FDV to Lever on Plate codes (e.g. 0807EXT/PB/L07/FDR) or add FDV or FDZ to knob on Plate codes (e.g. 0807EXT/PB/K21/FDZ).

Exterior Lever & Knob Options

As an alternative to using the Exterior Plate designs, as shown on the individual Cremone Bolt pages, there is the option of using an adapted Select Knob or Lever fitted to a Select Rosette or Plate. This will be supplied with a special Adaption Spindle as shown below (64mm max. door thickness).

Jointed Rods

Due to length restrictions of certain finishes some Rods will be supplied jointed - and supplied with a Cover Guide to conceal the joint. You will be advised at time of order/enquiry if jointed rods need to be supplied. An installation guide will be provided at this time.

Please note that some jointed Cover Guides are custom made versions of the standard guides to ensure that the joint is covered in both the open and closed positions.
